

May 1990

Import Requirements of Malaysia for the Importation
of Bovine Embryos Exported From the United States

The embryos must be accompanied by a U.S. Origin Health Certificate issued by a veterinarian authorized by the U.S. Department of Agriculture (USDA) and endorsed by a Veterinary Services (VS) veterinarian. The certificate shall contain the name and address of both the consignor and consignee, a complete identification of the donor animals, and the donors date of birth. Additional information shall include:

Certification Statements:

1. All donors originated from herds officially free of brucellosis and tuberculosis or were tested for the two diseases within the 60 days prior to or up to 365 days after the collection of the embryos for exportation to Malaysia.
2. All embryos were washed at least 10 times with each washing being at a 1:100 dilution of the previous wash according to the standards of the International Embryo Transfer Society as approved by the International Office of Epizootics.
3. No cases or clinical evidence of the following diseases were known to exist on the farm of origin for the last 12 months: Johne's disease, leptospirosis, vibriosis, trichomoniasis, vesicular stomatitis, enzootic bovine leukosis, bluetongue or infectious bovine rhinotracheitis/infectious pustular vulvovaginitis (IBR/IPV).
4. The United States has been free of rinderpest, contagious bovine pleuropneumonia, and foot-and-mouth disease for the 12 months prior to collection of the embryos for export.
5. The embryos were placed in new or disinfected containers for transport to Malaysia and the liquid nitrogen utilized has never been used before.

Other Information:

1. Donor cows from herds in officially tuberculosis and brucellosis free States will qualify without individual animal tests. Donor cows from herds that are officially brucellosis free or accredited tuberculosis free will qualify in other States without individual animal tests.

All other donor cows will be required to be individually tested as indicated in certification statement #1.

2. Health certification shall be made on the specific certificate for exportation of bovine embryos to Malaysia. This certificate shall be signed by the U.S. Department of Agriculture (USDA) accredited veterinarian supervising the collection of the embryos. Endorsement by the USDA veterinarian is verification for certification statement #4.
